

DESIGN TOOL

3D Design Studio

Visualize your artwork wrapped around the selected iLLUMiTUBE before you place the order.

What the Studio helps you do

- Choose the tube size you are considering.
- Upload and visualize your artwork around the cylindrical wrap.
- Rotate the product to see how the design travels around it.
- Use the view alongside Pricing & Planning before placing the order.

The 3D preview is a visualization tool. Final production still follows the approved size-specific artwork template and normal proof approval.

If you already have artwork

Open the Studio, select the correct size, and start visualizing the wrap.

If your supplied design needs production preparation

Artwork Prep Service is \$70 for one supplied design. Additional supplied designs requiring preparation are \$45 each.

If you need us to create the design

Custom Design Service is \$150 per order and includes up to two unique designs plus one reasonable customer-requested revision round. Additional unique designs are \$95 each, and additional revision rounds are \$45 each.

If you are still working on the budget

Use illumitubes.com/pricing/ first. The planner can combine different heights and quantities and create a printable estimate.
